PREFACE

This volume of the annual hydrologic data report of Tennessee is one of a series of annual reports that document hydrologic data gathered from the U.S. Geological Survey's surface- and ground-water data-collection networks in each State, Puerto Rico, and the Trust Territories. These records of streamflow, ground-water levels, and quality of water provide the hydrologic information needed by State, local, and Federal agencies, and the private sector for developing and managing our Nation's land and water resources.

This report is the culmination of a concerted effort by dedicated personnel of the U.S. Geological Survey who collected, compiled, analyzed, verified, and organized the data, and who typed, edited, and assembled the report. In addition to the authors, who had primary responsibility for assuring that the information contained herein is accurate, complete, and adheres to Geological Survey policy and established guidelines, most of the data were collected, computed, and processed from the field offices. The following individuals supervised the collection, processing, and tabulation of the data:

Terry D. Phillips, Knoxville Jerry W. Garrett, Memphis J. Tim Hamilton, Nashville

The following individuals contributed to the collection, processing, and preparation of the data:

M.W. Bennett	C.F. Glover	R. Thomas
D.E. Butner	J.A. Kingsbury	T.D. Turner
J.W. Cobb	D.E. League	K.A. Waltenbaugh
N.H. Craig	P.Powers	

This report was prepared in cooperation with the State of Tennessee and with other agencies under the general supervision of Paul S. Hampson, Data Management Section Chief, and W. Scott Gain, Director, Tennessee Water Science Center.
